

Human CD7-hIgG1

Cat No.:	03-01-0104
Product Name:	Human CD7-hIgG1
Description:	CD7, a member of the immunoglobulin superfamily, is expressed on thymocytes and mature T cells. It plays an essential role in T-cell interactions and also in T-cell/B-cell interaction during early lymphoid development. CD7 can be aberrantly expressed in refractory anaemia with excess blasts (RAEB) and may confer a worse prognosis. Also, a lack of CD7 expression could insinuate mycosis fungoides (MF) or Sezary syndrome (SS).
Type:	Protein
Property:	Recombinant Protein
Source:	HEK293
Genbank No.:	P09564 (aa.26-180)
Applications:	ELISA, WB, Immunogen
Formulation:	Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4).
Purity:	>95%
Storage:	Store at -80°C, Avoid freeze / thaw cycle.
Limitation:	For research use only, not for use in diagnostic procedures.
