

Mouse CD11a

Cat No.:	03-01-0161
Product Name:	Mouse CD11a
Description:	CD11s, also called integrin alpha L (ITGAL), is a member of the integrin family. It forms heterodimeric integral membrane proteins with a beta 2 chain (ITGB2) (CD18), comprising an important integrin lymphocyte function-associated antigen-1 (LFA-1). LFA-1 plays a central role in leukocyte intercellular adhesion through interactions with its ligands, ICAMs 1-3 (intercellular adhesion molecules 1 through 3), and also functions in lymphocyte costimulatory signaling.
Type:	Protein
Property:	Recombinant Protein
Source:	HEK293
Genbank No.:	P24063 (aa.24-1087)
Applications:	ELISA, WB, Immunogen
Formulation:	Each vial contains 50ug purified protein (1mg/ml) in PBS (pH 7.4).
Purity:	>95%
Storage:	Store at -80°C, Avoid freeze / thaw cycle.
Limitation:	For research use only, not for use in diagnostic procedures.
