

Human CD14/TLR4-hlgG4(KLH)

Cat No.: 03-01-0204

Product Name: Human CD14/TLR4-hlgG4(KLH)

CD14 serves as a co-receptor (along with the Toll-like Description: receptor TLR 4 and MD-2) for the detection of bacterial lipopolysaccharide (LPS).CD14 can bind LPS only in the presence of lipopolysaccharide-binding protein (LBP). Although LPS is considered its main ligand, CD14 also recognizes other pathogen-associated molecular patterns such as lipoteichoic acid.CD14 is expressed mainly by macrophages and (at 10-times lesser extent) by neutrophils, which exists as GPI anchored or soluble forms.CD14 mediates the innate immune response to bacterial lipopolysaccharide (LPS), via MyD88, TIRAP and TRAF6. NF-kappa-B leading to activation, cvtokine secretion and the inflammatory response.

Type: Protein

- Property: Recombinant Protein
- Source: HEK293

Genbank No.: P08571

Applications: ELISA, WB, Immunogen

Formulation: Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4).

Purity:	>95%
Storage:	Store at -80°C, Avoid freeze / thaw cycle.
Limitation:	For research use only, not for use in diagnostic procedures.
