

Mouse CD34-mlgG2a

Cat No.: 03-01-0360

Product Name: Mouse CD34-mlgG2a

Description: CD34,known as hematopoietic progenitor cell

antigen, functions as a cell-cell adhesion factor, and mediate

the attachment of stem cells to bone marrow extracellular

matrix or directly to stromal cells.CD34 is a commonly used

cell surface marker for Hematopoietic Stem Cells.Cells

expressing CD34 (CD34+ cell) are normally found in the

umbilical cord and bone marrow as hematopoietic cells, a

subset of mesenchymal stem cells, endothelial progenitor

cells, endothelial cells of blood vessels but not lymphatics

(except pleural lymphatics), mast cells, a sub-population

dendritic cells (which are factor XIIIa-negative) in the

interstitium and around the adnexa of dermis of skin, as well

as cells in soft tissue tumors like DFSP, GIST, SFT, HPC,

and to some degree in MPNSTs, etc. The presence of

CD34 on non-hematopoietic cells in various tissues has

been linked to progenitor and adult stem cell phenotypes.

Type: Protein

Property: Recombinant Protein

Source: HEK293

Genbank No.: Q64314 (aa.35-287)

Applications: ELISA, WB, Immunogen

Formulation: Each vial contains 50ug purified protein(1mg/ml) in

PBS(pH7.4).

Purity: >95%

Storage: Store at -80°C, Avoid freeze / thaw cycle.

Limitation: For research use only, not for use in diagnostic procedures.
