

Human CD30L

Cat No.:	03-04-1336
Product Name:	Human CD30L
Description:	CD30, also known as TNFRSF8, is a cell membrane protein of the tumor necrosis factor receptor family which interacts with its main ligand CD30L. This receptor is expressed by activated, but not by resting, T and B cells. TRAF2 and TRAF5 can interact with it, and mediate the signal transduction that leads to the activation of NF-kappaB. It is a positive regulator of apoptosis, and also has been shown to limit the proliferative potential of autoreactive CD8 effector T cells and protect the body against autoimmunity.
Type:	Protein
Property:	Protein
Source:	HEK293
Genbank No.:	P32971 (aa.63-234)
Applications:	WB,ELISA,Immunogen
Formulation:	Each vial contains 50
Purity:	>95%
Storage:	Store at -80°C,Avoid freeze / thaw cycle.
Limitation:	For research use only,not for use in diagnostic procedures.
Reference:	TNFSF8
