

## Human OX40L

Cat No.:	03-04-1393
Product Name:	Human OX40L
Description:	<p>Tumor necrosis factor receptor superfamily, member 4 (TNFRSF4), also known as CD134 and OX40, is a member of the TNFR-superfamily of receptors which is not constitutively expressed on resting naive T cells, unlike CD28. OX40 is a secondary co-stimulatory immune checkpoint molecule, expressed after 24 to 72 hours following activation; its ligand, OX40L, is also not expressed on resting antigen presenting cells, but is following their activation. Expression of OX40 is dependent on full activation of the T cell; without CD28, expression of OX40 is delayed and of fourfold lower levels.</p>
Type:	Protein
Property:	Protein
Source:	HEK293
Genbank No.:	P23510 ( aa.51-183)
Applications:	WB,ELISA,Immunogen
Formulation:	Each vial contains 50
Purity:	>95%
Storage:	Store at -80°C,Avoid freeze / thaw cycle.
Limitation:	For research use only,not for use in diagnostic procedures.

Reference: TNFSF4
