

Human RELT-hlgG1

Cat No.:	03-04-1430
Product Name:	Human RELT-hlgG1
Description:	RELT/TNFRSF19L is a member of the TNF-receptor superfamily. This receptor is especially abundant in hematologic tissues. It has been shown to activate the NF-kappaB pathway and selectively bind TNF receptor-associated factor 1 (TRAF1). This receptor is capable of stimulating T-cell proliferation in the presence of CD3 signaling, which suggests its regulatory role in immune response.
