| Cat No.:      | 03-04-0091  |
| Product Name: | Human PDCD6-hIgG1   |
| Description:  | <p>PDCD6(Programmed cell death protein 6)is a member of calcium-binding protein belonging to the penta-EF-hand protein family. Calcium binding is important for homodimerization and for conformational changes required for binding to other protein partners. This gene product participates in T cell receptor-, Fas-, and glucocorticoid-induced programmed cell death. In mice deficient for this gene product, however, apoptosis was not blocked suggesting this gene product is functionally redundant.</p> |
