

Monkey PDCD6-hlgG4

Cat No.: 03-04-0094

Product Name: Monkey PDCD6-hlgG4

Description: PDCD6(Programmed cell death protein 6)is a member of

calcium-binding protein belonging to the penta-EF-hand

protein family. Calcium binding is important for

homodimerization and for conformational changes required

for binding to other protein partners. This gene product

participates in T cell receptor-, Fas-, and

glucocorticoid-induced programmed cell death. In mice

deficient for this gene product, however, apoptosis was not

blocked suggesting this gene product is functionally

redundant.

Type: Protein

Property: Protein

Source: HEK293

Genbank No.: NP_001271949 (aa.23-191)

Applications: WB,ELISA,Immunogen

Formulation: Each vial contains 50

Purity: >95%

Storage: Store at -80°C, Avoid freeze / thaw cycle.

Limitation: For research use only, not for use in diagnostic procedures.
