

## 5)(A/Green-winged teal/ALB/199/1991) Antigen ELISA Development

|               |                                                                                                                                                   |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Cat No.:      | 07-02-0142                                                                                                                                        |
| Product Name: | HA(H12N5)(A/Green-winged teal/ALB/199/1991) Antigen<br>ELISA Development Kit                                                                      |
| Description:  | HA(H12N5)(A/Green-winged teal/ALB/199/1991) Antigen<br>ELISA Development Kit                                                                      |
| Type:         | ELISA Kit                                                                                                                                         |
| Property:     | ELISA Kit                                                                                                                                         |
| Applications: | For the quantitative analysis of HA(H12N5)(A/Green-winged teal/ALB/ 199/1991) hemagglutinin concentrations in cell culture supernatant and serum. |
| Storage:      | Store at -20°C,Avoid freeze / thaw cycle.                                                                                                         |
| Limitation:   | For research use only,not for use in diagnostic procedures.                                                                                       |
