

## NS1(DV4) ELISA Development Kit

|               |                                                                                             |
|---------------|---------------------------------------------------------------------------------------------|
| Cat No.:      | 07-02-0201                                                                                  |
| Product Name: | NS1(DV4) ELISA Development Kit                                                              |
| Description:  | NS1(DV4) ELISA Development Kit                                                              |
| Type:         | ELISA Kit                                                                                   |
| Property:     | ELISA Kit                                                                                   |
| Applications: | For quantitative analysis of NS1(DV4) concentrations in cell culture supernatants and serum |
| Storage:      | Store at -20°C,Avoid freeze / thaw cycle.                                                   |
| Limitation:   | For research use only,not for use in diagnostic procedures.                                 |
