

Human CDCP-1

Cat No.: 02-03-5012

Product Name: Human CDCP-1

Description: CUB domain-containing protein 1 (CDCP1) is a transmembrane protein containing three extracellular CUB domains. CDCP1 has also been designated as CD318 (cluster of differentiation 318) and Trask (Transmembrane and associated with src kinases). Alternatively spliced transcript variants encoding distinct isoforms have been reported. It is found to be overexpressed in colon and lung cancers. Its expression level is correlated with the metastatic ability of carcinoma cells. It has been shown to be tyrosine phosphorylated in a cancer cell line. Alternatively spliced transcript variants encoding distinct isoforms have been reported.

Type: Protein

Property: Protein

Source: HEK293

Genbank No.: UniProt ID: (Human) Q9H5V8 Entrez Gene ID: (Human) 64866

Formulation: Each vial contains 50 ug purified protein(1mg/ml) in PBS(pH7.45

Purity: >95%

Storage:	For short term, store at 4 °C, stable for 1 month. For long term storage, aliquot and freeze at -80 °C. Non-hazardous. No MSDS required.
Limitation:	For research use only, not for use in diagnostic procedures.
