

## anti-p24

|               |                                                                              |
|---------------|------------------------------------------------------------------------------|
| Cat No.:      | 01-01-3262                                                                   |
| Product Name: | anti-p24                                                                     |
| Description:  | anti-p24                                                                     |
| Type:         | Antibody                                                                     |
| Property:     | IgG1                                                                         |
| Source:       | Mouse                                                                        |
| Applications: | ELISA,IP,IF                                                                  |
| Formulation:  | Each vial contains 100                                                       |
| Immunogen:    | DNA vaccine expressing Gag protein (Clade A) of HIV-1(Genebank No. AY772985) |
| Specificity:  | Pan                                                                          |
| Purity:       | >95%                                                                         |
| Storage:      | Store at -20°C,Avoid freeze / thaw cycle.                                    |
| Limitation:   | For research use only,not for use in diagnostic procedures.                  |
