

Human CD334(FGFR4)

| | |
|---------------|---|
| Cat No.: | 03-01-2201 |
| Product Name: | Human CD334(FGFR4) |
| Description: | FGFR4 plays a role in the regulation of cell proliferation, differentiation and migration, and in regulation of lipid metabolism, bile acid biosynthesis, glucose uptake, vitamin D metabolism and phosphate homeostasis. Required for normal down-regulation of the expression of CYP7A1, the rate-limiting enzyme in bile acid synthesis, in response to FGF19. This particular family member preferentially binds acidic fibroblast growth factor and, although its specific function is unknown, it is overexpressed in gynecological tumor samples, suggesting a role in breast and ovarian tumorigenesis. |
| Type: | Protein |
| Property: | Recombinant Protein |
| Source: | HEK293 |
| Genbank No.: | P22455 (aa.22-369) |
| Applications: | ELISA, WB, Immunogen |
| Formulation: | Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4). |
| Purity: | >95% |
| Storage: | Store at -80°C, Avoid freeze / thaw cycle. |
