

## **Mouse CD370**

Cat No.: 03-01-2397

Product Name: Mouse CD370

Description: CLEC9A (which has also been termed DNGR1) is the most

recently characterized receptor from the Dectin-1 cluster

and is expressed in many tissues. In peripheral blood,

human CLEC9A is found primarily on the surface of

BDCA3+ DCs, although this receptor was also detected on

small subsets of monocytes and B-cells. CLEC9A may

function as an activation receptor, and was capable of

internalizing bound antigens via endocytosis and directing

them to the endosomal/lysosomal pathway, resulting in

enhanced humoral, CD4+ and CD8+ T-cell responses, even

in the absence of adjuvant.

Type: Protein

Property: Recombinant Protein

Source: HEK293

Genbank No.: ABZ04558 (aa.55-238)

Applications: ELISA, WB, Immunogen

Formulation: Each vial contains 50ug purified protein(1mg/ml) in

PBS(pH7.4).

Purity: >95%

Storage: Store at -80°C, Avoid freeze / thaw cycle.

Limitation: For research use only, not for use in diagnostic procedures.
