

## HA1(H7N3)(A/chicken/Jalisco/CPA1/2012)

|               |                                                                                                                                                                                               |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cat No.:      | 01-02-0611                                                                                                                                                                                    |
| Product Name: | HA1(H7N3)(A/chicken/Jalisco/CPA1/2012)                                                                                                                                                        |
| Description:  | HA1(H7N3)(A/chicken/Jalisco/CPA1/2012)                                                                                                                                                        |
| Type:         | Recombinant Protein                                                                                                                                                                           |
| Property:     | C-terminal                      6xHis                      tagged                      HA1<br>(A/chicken/Jalisco/CPA1/2012)                      (H7N3)(a.a.19-344)<br>(Genebank #: AFN85519) |
| Source:       | HEK293                                                                                                                                                                                        |
| Genbank No.:  | AFN85519                                                                                                                                                                                      |
| Applications: | WB standard, Antibody ELISA, immunogen                                                                                                                                                        |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in PBS(pH7.4).                                                                                                                             |
| Purity:       | >95%                                                                                                                                                                                          |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                                                                                                                                                    |
| Limitation:   | For research use only, not for use in diagnostic procedures.                                                                                                                                  |
