

## GP(Ebola/Zaire/1995) (

|               |                                                                   |
|---------------|-------------------------------------------------------------------|
| Cat No.:      | 01-06-0004                                                        |
| Product Name: | GP(Ebola/Zaire/1995) (                                            |
| Description:  | GP(Ebola/Zaire/1995) (                                            |
| Type:         | Protein                                                           |
| Property:     | C-terminal 6xHis tagged GP(Zaire/1995)(                           |
| Source:       | HEK293                                                            |
| Genbank No.:  | AAQ55048                                                          |
| Applications: | WB standard, Ab ELISA, immunogen, etc.                            |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in PBS(pH7.4). |
| Purity:       | >95%                                                              |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                        |
| Limitation:   | For research use only, not for use in diagnostic procedures.      |
